KNOW ME

Now I'm a student in web development at Esprit .
Motivated, energetic, serious, competent, and with a quick learning curve. Seeking to leverage broad development experience and hands-on technical expertise in a challenging role as a Full-stack Developer.

SKILLS

Frontend skills
Html5/Css
Sass/Bootstrap
Javascript/Typescript
Angular Material
Angularjs
Angular 11
ReactJS

backend skills
Django
Spring/spring boot
Spring security
Node Js
Express Js
PHP
.Net

Data processing & visualization
Data mining
Pandas
Matplotlib
Seaborn
nosql:Mongodb
sql | pl/sql
neo4j

Network & Linux administration
Linux /Unix
Web service
network management
(SNMP)
mail service
LDAP

Programming language
OOP :
python/java/R
Modular programming:
c

Web service
Swagger
Postman
REST architecture
REST API Security
SOAP / GraphQl
JAX-B
JAX-RS
XML

EDUCATION

≫ Computer Engineering student at the Private Higher School of Engineering and Technologies - ESPRIT
(sep 2020 - 2023)
Speciality : Web development technologies

≫ Preparatory Studies for engineering at Monastir University (Maths and Physics) (2017/2020)

LANGUAGE

- **English :** advanced intermediate
- **French :** advanced intermediate : Tcf B2
- **Arabic :**   Native Language

PROJECTS

≫ *Smart Farm*
It's a desktop application based on the design and realization of an intelligent farm using C as a programming language.

≫ *Location de smart application*
It's a rental desktop app used to apply for a location quickly and efficiently.
Technologies : java , javafx, scene builder, jdbc.

≫ *Project Assurance*
Realization of a micro-insurance application dedicated to people with low incomes (freelance)
Technologies : Angular , Spring

≫ *Professional web app*
In the context of my first internship in CPG .. Using my web development knowledge I was able to help push forward the company's path to digitalization ,
it's a web application that manages trainees.
Technologies : php , angularjs , javascript, html ,css, bootstrap 5.

≫ *Store management system website*
In the context of a group project , i was able with a group of 6 person to work together in order to develop a web application for a Magasin management.
Technologies : Angular , Spring , Angular Material.

≫ *Social marketing and emotion detections*
In the context of PI dev project , i was able with a group of 4 person to create an app which helps the consumer to deposit his used products for sale. Chat bot to detect his feedback based on his emotions, system for donation and exchange products , voice assistant , Profiling ,ads ,map management for campaigns , Chat Room (video) , ecommerce , stream connection , messaging ..
Technologies : MERN : mongo,react,node,express ,socket io , redux, peerjs , rasa , python , javascript , django Restful , deep learning ,git …
The project has been selected among 100 projects to participate in BAll of projects event .

CERTIFICATES

≫ Certificate of completion in Machine Learning & deep Learning in Python from Start-tech Academy (Udemy)

≫ Verified Certificate of Participation:
Full Stack Development Track from Udacity (One million Arab Coders initiative)

≫ Sololearn certification (PHP)

ACTIVITIES AND INTERESTS

- Playing Chess .
- Launching a book club called "Les bibliophiles" with a group of friends .
- Astronomy and physics
- Philosophy
